KUSAMA

Dear community,

As we continue expanding and enhancing IBP network, we are excited to share the recent developments and achievements of the IBP. For detailed information on monthly contributions and ongoing activities, please visit our repository at [https://github.com/ibp-network/ChildBounties.](https://github.com/ibp-network/ChildBounties).

IBP established 12 global locations instead of 10, achieving this expansion within our budget constraints across various regions:

Africa:
- Dwellir (Level 6, Active)

Central America:
- Gatotech (Level 6, Active)

Middle East:
- Helikon (Level 6, Active)

Europe:
- Metaspan (Level 6, Active)
- Turboflakes (Level 6, Active)
- Amforc (Level 6, Active)

North America:
- Stake Plus (Level 6, Active)
- Lucky Friday (Level 0, Pending)

Asia:
- Radium Block (Level 3, Active)
- Rotko Networks (Level 3, Active)

Oceania:
- Polkadotters (Level 2, Active)

South America:
-Block Ops (Level 0, Pending)

Each member plays a crucial role in network decentralization, supporting both the Polkadot and Kusama ecosystems.

Hobbyist Members:

KUSAMA

Our network is further strengthened by the involvement of five hobbyist members running a decentralized monitor solution:

- Aperturemining
- Dozenodes
- STKD
- Mathcrypto
- Paradox

Their contributions add significant value to our community-driven approach.

Currently, we are unable to accept new members as we reached Milestone 2 operational goal of 12 geodistributed locations. We have received several pending applications from Blockshard GmbH, Brightly Stake, Certhum, Infrastructure Corporation, and Node Runner FZCO. They are put on the waitlist until the program further expands and additional locations are introduced.

https://monitor.dotters.network

IBP is already implemented by multiple ecosystem applications, among those are:
- Polkadot.js
- Talisman wallet
- Nova wallet
- Subsquare
- Polkassembly
- Staking Dashboard
